Dashboard evidence:

The screenshot shows the 'Stock Management' section of the dashboard. It features a search bar, a filter dropdown set to 'All Colors', and a table of products with low stock. A yellow banner indicates '59 products with low stock'. The table has five columns: 'PRODUCT NAME', 'COLOR', 'LIST PRICE', 'SAFETY STOCK LEVEL', and 'CATEGORY'.

PRODUCT NAME	COLOR	LIST PRICE	SAFETY STOCK LEVEL	CATEGORY
Adjustable Race	N/A	\$0.00	1000	Uncategorized
Bearing Ball	N/A	\$0.00	1000	Uncategorized
BB Ball Bearing	N/A	\$0.00	800	Uncategorized
Headset Ball Bearings	N/A	\$0.00	800	Uncategorized
Blade	N/A	\$0.00	800	Uncategorized

! Long-Sleeve Logo Jersey, L	Multi	\$49.99	4	Clothing
! Long-Sleeve Logo Jersey, XL	Multi	\$49.99	4	Clothing

Prompt created to build the dashboard:

Hello, I want you to take the role of a frontend developer, a Vue3 expert. You will find a carpet called src, there is the backend project, take data from there. I want you to create a frontend project called (frontEnd-Challenge) inside of CodingBasicsSession with the following instructions:

1. Inventory Value: a KPI card showing the total sum of ListPrice across all products.
2. Distribution by color: A pie/doughnut chart (you can use Chart.js or ApexCharts) showing the product count per color.
3. Customer Analysis: A bar chart showing the number of people grouped by PersonType.
4. Stock Management: A table that filters or Highlights products with low SafetyStockLevel.

Make sure that ports are correct and check all dependencies if there is any issue so everything works out at first try, also if you can check that data is going to the frontend correctly.
